

# The QuarterMaster System

"True Volume Based Quarter System"

For years, many utilities have used quarter based systems that are "Time" based. While we here at AquaFlow see the benefit in getting rid of coins from the site, sometimes it is still the simple solution to running a water loading station. Aquaflow International Inc. is introducing the QuarterMaster System to fill that need.

Feature	Benefit
Multiple quarters to start	Sets minimum sale (and volume for that sale)
Volume added for each quarter after minimum	Customer can add volume as desired
Full system Log of Sales	Complete tracking of Quarters and Water Sales
Easy to install	Quick start-up time
Supports standard valve operations	Can use 12vdc, 24vdc or 115vac valves
Flow Sensor provided	No compatibility concerns
Low cost	Complete System from \$11,990

The Start-up QuarterMaster System includes:

Customer interface: 7.5" tall X 9.5" wide face plate with 4 x 20 line LCD screen, START, PAUSE, STOP buttons, and quarter mechanism

Interface housing: Metal enclosure with lid on both sides - 10" tall X12" wide X 7" deep, through-a-wall mount

Flow sensor: \*Seametrics IP Series flow sensor and 2" housing

Valve: \*2" Butterfly Valve, 115vac power open/ power close

\*Other sizes available upon request
